

This is an author produced version of figures from a paper published in
Science of The Total Environment.

This paper has been peer-reviewed but may not include the final publisher
proof-corrections or pagination.

Citation for the published paper:

Schneider, Susanne C.; Kahlert, Maria; Kelly, Martyn G. (2013) Interactions
between pH and nutrients on benthic algae in streams and consequences for
ecological status assessment and species richness patterns. *Science of The
Total Environment*. Volume: 444, pp 73-84.
