Errata

Thesis
BLASTN include in abbreviations
Section 1.3, pg 14, first paragraph line 2, “existing in the area or be attacked”
Section 3.1, after (a.s.), “and their distribution is shown in Figure 1”
Section 3.3, Pg 25, 2nd paragraph 2nd line 2, “after which they were…”
Pg 30, 2nd paragraph line 2, formed the slit plot within each replicate”, not formed with each replicate
Pg 33 is paragraph line 4, delete ‘during the’
Section 4.2 Pg 36 1st paragraph Table 3 should read Table 2
   Same Pg 36, 2nd paragraph Table 5 should read Table 4
Pg 37, 2nd paragraph line3, To read “A few species with an occurrence of “2-5%” not 2%
Pg 39, 4th paragraph line 2. To read “Only two species were identified” and not only two of species of each group identified.

Paper II
Pg 1 Introduction, line 1, is a native of Eastern Australia
Pg 2, 1st paragraph, survey not surveys done in 2005 showed that... delete the 2nd that the disease was...
Pg 7 Shannon Weaver formula to read “H' = -\sum pi ln (pi) where H' =", not H' = -
   •pi ln (pi) where H' =
Results, Pg 7 2nd paragraph line 1 should read “analysis identified the 38”.. and not analysis grouped the 38
Pg 9 2nd paragraph line 1 should read, Further exploration of 17 ..... with an occurrence of >1% not •1%
Pg11 after Table 4 should read ..... “isolated from <30 trees” not •30 trees
Pg 14 paragraph 2 line 3, “molecular data obtained from members of … were related to those”…
Paper III
Pg 2 paragraph line 3, should read, “Identification of these pathogens has greatly been improved by”
Pg4 2nd paragraph line 1, to read “Phylogenetic analyses were performed” not performer
Pg 6, Table 1 “Perez et al and Pavlic et al. to read Perez et al., and Pavlic et al.
Pg 6, Table 1 legend “*** All isolates collected by Njuguna J. W were from Grevillea robusta except FJ904843 that was from Senna siamea. All other isolates are from previous published studies on Botryosphaeriaceae”
P6 Table 1, last row to read “Hunter, G. C., Wingfield, B. D., Crous, P. W. and Wingfield, M. J.” not Barnes et al. 2004
Pg 9, Discussion 1st paragraph line 4 to “A related mycological study showed that these two species... deleted pathogenicity tests further showed that
Pg 9, Discussion 2nd paragraph line to read, “It was therefore possible that these were new species developing”
Pg 17, 2nd Rayner reference deleted

Paper IV
Page 1 Author, to read, Njuguna J. W. 1,2 not Njuguna J. W. 1,2,3
Pg 2 3rd paragraph last row “M. Volkensii germplasm to increase seedling production
Pg 9 Discussion 1st paragraph 2nd line to read “we tested the ability of the following pathogens to cause disease” not these pathogens
Pg 10 paragraph 3 line 5 the following species should be in italics Macadamia tetraphylla, Terminalia catappa, Podocarpus falcatus
Pg 10, paragraph 4 line 3, to read “...tree planting is a relatively new practise in some areas, having started in the 1980s...
