Acknowledgements

I would like to express my sincere gratitude to the following people in my academic and personal life who made this dissertation possible:

My main supervisor, Gesa Weyhenmeyer, for believing in me and for providing me with tremendous help and invaluable guidance. Her enthusiasm, optimism, and strong attitude have been the guiding forces behind my research and kept me motivated through the ups and downs.

My co-supervisor, Michèle Prévost, for introducing me to this interesting subject and for generously sharing her knowledge in this field. Her encouragement, unwavering support, trust, and patience have always been the source of inspiration both in my research and personal life.

My co-supervisor, Leif Kronberg, for providing me with the opportunity to conduct part of my experimental work in his lab and for fruitful collaboration and scientific support.

My co-supervisor, Jenny Krueger, for her positive attitude and endless help whenever I needed it.

My co-supervisor, Jerker Fick, for his contribution in the early planning of this project and scientific advice.

Jesper Svanfelt and Liza Viglino for giving me the thorough instruction on LC-MS/MS and sharing their theoretical and experimental skills in chemistry.

Technical staff from the geochemical laboratory at SLU and CREDEAU laboratory at École Polytechnique de Montréal for their assistance with water chemistry analyses.

Herman Paz for the computer support, and Annika Lundberg, Hans Eurell, and Maria Bywall for the administrative support.

The present and former roommates and colleagues in Sweden and Canada, especially Emma Göthe, Ina Bloch, Simon Hallstan, Maria Khalili, Salar Valinia, Jenny Rydh Stenström, Ana Villa, Karin Eklöf, Karin Johansson,

Marcus Wallin, Anna Lundqvist, Peter Carlson, Nilofar Åkerlund, Stina Drakare, Mikael Östlund, Lars Sonesten, Ulf Grandin, Gunborg Alex, Mårit Peterson, Eva Lundgren, Åsa Ramberg, Christer Jansson, Shokoufeh Noor, Romain Broséus, Khadija Aboulfadl, Anne-Sophie Madoux-Humery, France Boisclair, Sébastien Sauvé for their support, generous help, friendship, and enjoyable discussions.

My family, relatives, and friends all over the world, especially my mom, Farideh, my dad, Mehran, my sister, Arghavan, and my brothers, Ardeshir and Ashkan, for dedication, patience, unconditional love, and encouragement through this journey.

My little princess, Clarice, for showing me the real sense of joy in life and Ardeshir, the true love of my life, for his generous support, incredible patience, and for standing beside me during the hardest moments of my life. I am very lucky to have them in my life!

Financial support of this project was mainly provided by the Swedish Research Council for Environment, Agricultural Sciences, and Spatial Planning (Formas) and partly by NSERC-Industrial Chair on Drinking Water at École Polytechnique de Montréal. The financial support is gratefully acknowledged.

Atlasi Daneshvar
