

Research in Relation to SDGs

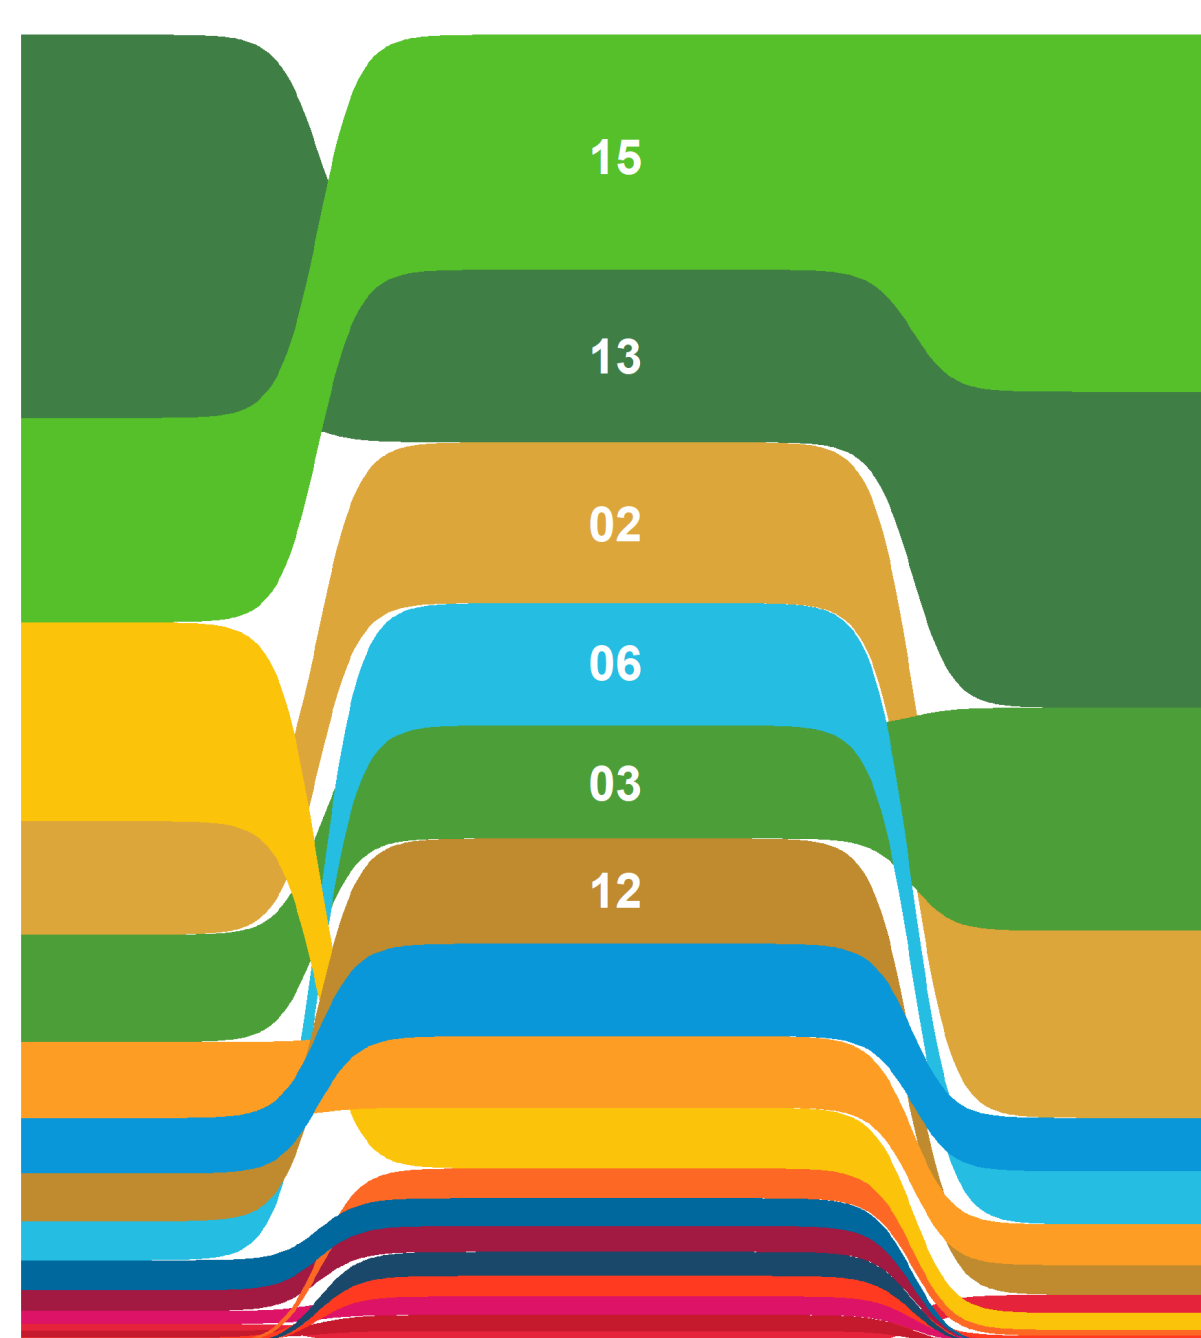

The Case of Swedish University of Agricultural Sciences

THERE WILL BE SDGs

Many bibliographic databases attempt to map publications to the 17 UN Sustainable Development Goals (the SDGs). All use different methods, and get different results.

SLU has combined search strategies with manual validation by an SDG-team of librarians to improve accuracy of tagging.

SDGs UNCHAINED

The SDG metadata from the tagging is showcased in the SLU repository. The related SDGs (if any) are visible on each publication's landing page.

Researchers at SLU can login and suggest SDGs for their own publications as a way to further enhance the coverage.

2024: AN SDG ODYSSEY

Through the validation work, librarians have deepened their knowledge of the SDGs and also of SLU's research output. Librarians' understanding of synergies between SDGs as well as departments have made it possible to tag publications not usually found in other databases.

Unique material from SLU, such as reports, fact sheets, dissertations and popular science publications will also be tagged with the SDGs during this year.
